RELEVANT EXPERIENCE

Queen's Aerospace Design Team | Kingston, ON

Sept. 2025 - Present

Autonomy Software Team Member

- Developing a fully autonomous robot in **C++ and Python** to lead Queen's University at the international competitions of **AIAA and AEAC**. Working in collaboration with a team of 150+ members.
- Optimizing the software for **reliability** and **efficiency** while directly working with low-level C++ APIs.

Queen's QHacks Hackathon Team | Kingston, ON

May 2025 - Present

Technology Team Executive Director

- Developed a full website and hacker dashboard using **Node.js** and **React.js** frameworks and improved loading time efficiency by up to 10 seconds through optimized backend processes and caching strategies.
- Ensured **100% website uptime** for a reliable experience that reaches **1000s** of students from everywhere in Canada and across the world who compete at QHacks every year.

PROJECTS

DaVinci | *GenAI Genesis*

Oct. 2024

- Partnered with a team of 3 and developed a fully functional **website** with a dynamic **kid-friendly** interface, real-time image and text generation with prompts using the **Gemini API**, and **Firebase** for the backend.
- Competed across 3 award categories including for the best use of the Gemini API.

Cinemattic | *Personal Project*

May 2023

- Created a powerful and useful movie search and favourite website in **React.js** using the **TMDB API**.
- Designed the user interface using **Figma** and implemented it with the **MUI** framework.

LEADERSHIP EXPERIENCE

Bridge to Campus | Kingston, ON

Sept. 2025 - Present

Upper-year Mentor

- Student-led and local nonprofit that connects university students with high school students from underserved and rural areas across Canada, providing them with crucial mentorship and academic services at no cost.
- Lead weekly one-to one meetings with a mentee to discuss progress, challenges, and share experiences.
